## **DETAILED ACTION**

# Notice to Applicant(s)

1. This communication is in response to the application filed on July 26, 2001. The restrictions cited are as stated below:

## Election/Restrictions

- 2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - Claims 1-28, drawn to "Computer Conferencing," classified in class 709, subclass
     204.
  - II. Claims 29-48, drawn to "Computer Network Managing," classified in class 709, subclass 223.
  - III. Claims 49-54, drawn to "Operator Interface-Computer Conferencing," classified in class 715, subclass 753.
- 3. Inventions I-III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case:

Invention I has separate utility such as participating in a recorded video and/or audio conference with multiple users.

Invention II has separate utility such as controlling how the information is recorded and outputted during a messaging session.

Invention III has separate utility such as utilizing a graphical user interface to display and select the session options on a computer monitor.

Application/Control Number: 09/915,540 Page 3

Art Unit: 2153

4. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Marilyn Dawkins on February 13, 2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Art Unit: 2153

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robianca Perry whose telephone number is 571-272-5812. The examiner can normally be reached on Monday through Friday from 8:30am to 5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenton Burgess can be reached on 571-272-3949. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
